

At Dudley Associates, we are committed to protecting the environment and developing our understanding and initiatives where this is concerned.

This policy sets out our approach to environmental management, which we believe contributes to a successful and responsible company.

Our policy will be provided to all members of staff, who each have an individual responsibility on their impact upon our environment both individually and for the company combined.

In confirming our commitment to the protection of the environment, set out within this policy, we will treat our responsibilities and initiatives as minimum standards, and will review and improve this consistently and periodically.

Our Mission:

- To identify the environmental impact of our activities to implement a policy that reflects the initiatives that Dudley Associates are focused on as a business and as individuals within the business.
- To develop these initiatives and monitor our activity as a company and as individuals.
- To implement, drive and maintain these initiatives and encourage responsibility by applying appropriate operational procedures to minimise our environmental impact.

Our Policy:

- Ensure all staff are aware of environmental management and are responsible for their actions, by delivering regular training updates.
- To encourage and actively reduce, re-use and recycle wherever possible; using the recycling facilities provided within the business.
- We have ensured all lighting is energy efficient and continue to use energy efficient lightbulbs, whilst encouraging turning off lights when not in use or needed.
- We have made a significant investment in machinery which have higher energy efficiency and continue to do so in any future investments.
- Make every effort to operate efficiently and seek to reduce energy and water consumption (through continual process improvement).
- Use where possible environmentally conscious materials.
- Ensure that good housekeeping is practiced in the workplace and surrounding area
- Ensure we are legislatively compliant by regularly undertaking environmental assessments.
- Ensuring the application of best available practice in environmental protection is being undertaken by all employees.
- Encouragement and requirement of individual responsibility for compliance with our environmental policy from all employees.
